

**EXPRESS MAIL LABEL NO.: EV343426417US**

**ABSTRACT OF THE DISCLOSURE**

A system, method and computer program product are disclosed for providing automatic recurring online payments. According to the method, an automatic recurring online payment configuration is received from a user. A notification is sent to the user of a pending automatic payment based on the automatic recurring online payment configuration, and it is determined whether or not to execute the pending automatic payment based on at least one of a response to the notification received from the user and a lack of a response to the notification from the user. In one embodiment, if the response authorizes the pending automatic payment, the pending automatic payment is executed according to the automatic recurring online payment configuration, if the response modifies the pending automatic payment, the pending automatic payment is executed as modified, and if the response cancels the pending automatic payment, the automatic recurring online payment is canceled.
